

Dear Valued Customer

Well, we just had what I would call a “normal” winter. Unlike the past few years, I am expecting a later start this year. So, I have enclosed my tentative schedule for spring startups and fall shutdowns.

Along with the schedule for each city, I have enclosed a price list of each service. The pricing of services for 2018 will remain the same.

Again this year, I will try to make your life simpler. I will assume that the services I performed for you last year will be the same this year. If you want to change your services; please email me at **jmoody55317@earthlink.net** or call/text me at 952-448-5720.

During the spring startups, I will automatically do repairs that involve sprinkler heads and any repair that takes less than 10 minutes. For longer repairs, I will schedule a service call after spring startups are done (approximately after May 21st). Generally, there is no additional service call charge for these repairs (just time and material).

As in past, I will call 2-3 days ahead of time to schedule each service. I have enclosed **approximate** dates for spring startups and fall shutdowns by location. I rotate the dates of services for each city from year to year to be fair to all. Please **mark** on your calendars the approximate dates of each service.

You will find my contact info, prices, and schedule at ***jeffsprinklerservices.com***.

Please keep the enclosed price list for future references. If you want to change your services or have questions; please email me at **jmoody55317@earthlink.net** or call/text me at 952-448-5720.

Thank you from Jeff Moody
Jeff's Sprinkler Services Co

PS: You can cut your water bill by turning off your sprinkler clock when the weather is cool and damp (I only watered 15 days last year). Also, use your seasonal adjust or water budget (on your sprinkler controller) as the seasons change. Generally in Minnesota, a sprinkler system only needs to be used to supplement the rainfall from June 21 to September 15th.
