

Dear Valued Customer

The Winter That Will Not End will eventually end sometime in April. Consequently, I am planning on starting my sprinkler startups a week later than normal.

This will be my last year of mailing out a spring letter. Starting in 2020, my spring letter, along with the price list/schedule will be available thru email and my website ([jeffsprinklerservices.com](http://jeffsprinklerservices.com)). About 1/4 of my customers now receive my spring letter thru email. So if you are not receiving this letter thru email and would like to in the future; please send your email information to [jmoody55317@earthlink.net](mailto:jmoody55317@earthlink.net) or text me at 952-448-5720.

Again this year, I will try to make your life simpler. I will assume that the services I performed for you last year will be the same this year. If you want to change your services; please email me at [jmoody55317@earthlink.net](mailto:jmoody55317@earthlink.net) or call/text me at 952-448-5720.

During the spring startups, I will automatically do repairs that involve sprinkler heads and any repair that takes less than 10 minutes. For longer repairs, I will schedule a service call after spring startups are done (approximately after May 21st). Generally, there is no additional service call charge for these repairs (just time and material).

As in past, I will call 2-3 days ahead of time to schedule each service. I have enclosed **approximate** dates for spring startups and fall shutdowns by location. I rotate the dates of services for each city from year to year to be fair to all. Please **mark** on your calendars the approximate dates of each service.

You will find my contact info, prices, and schedule at [jeffsprinklerservices.com](http://jeffsprinklerservices.com).

Please keep the enclosed price list for future reference. If you want to change your services or have questions; please email me at [jmoody55317@earthlink.net](mailto:jmoody55317@earthlink.net) or call/text me at 952-448-5720.

Thank you from Jeff Moody  
Jeff's Sprinkler Services Co

PS: You can cut your water bill by turning off your sprinkler clock when the weather is cool and damp (I only watered 13 days last year). Also, use your seasonal adjust or water budget (on your sprinkler controller) as the seasons change. The new wifi controllers (I recommend the brand Rachio) will do these adjustments automatically. Generally in Minnesota, a sprinkler system only needs to be used to supplement the rainfall from June 21 to September 15th.
